DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Outwater et al. (US 6,354,501, hereinafter “Outwater”).

Re claims 1, 5-7, 9, and 10, Outwater discloses a barcode label which contains both visible portion of the code and an invisible portion of the code under normal (or visible) lighting environment (see abstract; col. 2, lines 51+; col. 3, lines 52+). The invisible portion of the code is coded by an UV (ultraviolet) ink or fluorescent ink (col. 1, lines 60-67). The code is visible when illuminated by a particular spectrum of ultraviolet light (col. 1, lines 51-59). The UV or fluorescent ink does not react to the visible spectrum (380-770 nm) but is visible when illuminated with light in the UV spectrum (200-380 nm).

Re claim 11, the pressing the foil against the article, the section of the article contacting the blank portion of the foil is exposed to be printed (col. 4, lines 57+; see claim 3).

Art Unit: 2876

Re claims 2-4, the ink is applied by one of hot stamping, thermal ribbon printing or ink jet printing methods (col. 4, line 66 – col. 5, line 4). In applying hot stamping, a hot stamping foil 50, which may be plastic, mylar, polypropylene or polyester is used to print the mark 10 onto an article (col. 4, lines 44+).

Re claim 8, the light receiving section includes an IR light blocking filter 160 (col. 5, lines 54+).

Conclusion

I. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Chatwin et al. (US 5,492,370); Uchbori (US 5,645,932); Mochida et al. (US 6,317,149) disclose hot stamping of labels or Gravure process. Applicant is respectfully suggested to carefully review these references.
